

# PatientKeeper® Medication Reconciliation™ for ED Use

## Continuing Home Medications in the ED

1 Select a patient.

2 A. Select the **Actions** drop-down and then select **Continue Home Meds**, or

B. Select the **Orders** link, and then click the **Continue Home Meds** button.

The screenshot shows the PatientKeeper interface. On the left, a list of patients is displayed. The patient 'DAVIDSON, HENRY' is selected. In the center, the 'Actions' drop-down menu is open, showing options like 'Continue Home Meds' and 'Orders'. The 'Orders' link is also visible in the left sidebar. A red box highlights the 'Continue Home Meds' button in the Actions menu.

3 Review the list of home medications and select an **Action for Hospitalization** of either **Continue** or **Change** for only the relevant home medication(s) and leave the others to the admitting physician. You may also add a new hospital order by clicking the **Add** button next to **Hospital Orders**.

If prompted, complete contents of any **Search** or **Order Details** window to add as a new hospital order. If a warning pop-up is triggered, complete any required actions.

The screenshot shows the 'Continue Home Meds' window. It displays a list of home medications with columns for 'Home Medications', 'Action for Hospitalization', and 'Hospital Orders'. The 'Action for Hospitalization' column has radio buttons for 'Continue' and 'Change'. The 'Hospital Orders' column has an 'Add' button. A red box highlights the 'Continue' radio button for 'Atenolol 50 MG PO QAM'. A red arrow points from the 'Continue' radio button to the 'Add' button. A red box highlights the 'Add' button. A red arrow points from the 'Add' button to the 'New: Exforge HCT 10 mg-160 mg-25 mg Tab (amlodipine-valsartan-hctz) 25 MG PO QAM' entry. A red box highlights the 'Submit Orders' button at the bottom.

4 Click the **Inline Alerts** in the **Hospital Orders** column to review the interaction information and determine if changes are needed.

5 Click **Reconcile and Submit**. The continued or changed home medications are then submitted as new hospital orders.
